

AASHUTOSH SONI

Full Stack Developer · MERN Stack · AI Agent Builder · Technical Trainer

aashutoshsoni2019@gmail.com | +91 9755628076
Pendra Road, Chhattisgarh, India | linkedin.com/in/aashutosh-soni

PROFESSIONAL SUMMARY

Results-driven **Full Stack Software Developer** and **Technical Trainer** with an MCA background and 2+ years of hands-on experience building scalable web applications, AI Agents, and AI-powered websites. Proficient in the **MERN Stack** (MongoDB, Express.js, React.js, Node.js) with real-world government project delivery at the **National Informatics Centre (NIC)**. Experienced in designing and deploying intelligent LLM-powered agents and integrating AI into full-stack products. A strong technical communicator who has trained students across 10+ schools — bridging complex engineering concepts with practical, industry-ready skills. Actively seeking a developer role to contribute meaningfully from day one.

TECHNICAL SKILLS

Frontend	React.js, HTML5, CSS3, JavaScript (ES6+), Responsive UI/UX Design	Backend	Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware
Database	MongoDB, SQL, DBMS, Schema Design & Normalization	AI & Agents	AI Agent Development, LLM APIs (OpenAI / Gemini / Claude), Agentic Workflows
AI Tools	AI-Powered Website Building, Prompt Engineering, Automation Pipelines	Mobile Dev	Android App Development, MIT App Inventor, Rapid Prototyping
Core CS	Data Structures & Algorithms, OOPs, Git & Version Control	Soft Skills	Problem Solving, Project Management, Client Communication, Team Leadership

WORK EXPERIENCE

Account Manager & Technical Trainer

Apr 2024 – Mar 2026

[Codevidhya](#)

- Designed and delivered comprehensive training programs in HTML, CSS, JavaScript, Python, Robotics, and AI to students across 10+ DAV schools — consistently improving practical coding skills and project outcomes.
- Built and deployed **multiple AI Agents** using LLM APIs (OpenAI, Gemini, Claude) for real-world use cases: task automation, intelligent Q&A bots, content generation pipelines, and workflow orchestration.
- Developed fully functional, production-ready websites using AI-assisted development tools — handling end-to-end workflow from UI design and component generation to live deployment.
- Integrated AI features (chatbots, smart search, dynamic content) into MERN Stack web applications for enhanced user experiences.
- Managed school-level stakeholder relationships, coordinated bootcamp deployments, and ensured seamless curriculum rollouts across multiple institutions.
- Mentored students in mobile app rapid prototyping using MIT App Inventor — built live demo prototypes during sessions.

Computer Science Lecturer

2023 – 2024

[Dr. Bhawar Singh Porte College, Pendra](#)

- Taught university-level courses: Database Management Systems (DBMS), SQL, Schema Normalization, and Web Engineering — bridging academic theory with industry-standard practice.
- Conducted rigorous practical lab sessions in HTML, CSS, and JavaScript; mentored students in debugging, logic building, and clean code practices.
- Improved student pass rates through structured doubt-clearing sessions and project-based learning approaches.

Full Stack Mobile App Development Intern

Feb 2023 – Jul 2023

[National Informatics Centre \(NIC\), Raipur](#)

- Actively contributed to the complete product lifecycle — UI design, development, testing, and deployment — of **"CG Kisan"**, a live government agricultural mobile application serving farmers across Chhattisgarh.
- Collaborated with senior engineers in Agile sprints; optimized application performance, refined features, and resolved critical runtime bugs under enterprise-grade quality standards.
- Gained deep experience in government software project lifecycles, strict delivery timelines, and real-world deployment workflows.

KEY PROJECTS

MERN Stack Full-Stack Web Applications

Self-Initiated | Portfolio

- Built multiple full-stack web apps with secure **JWT authentication**, RESTful API design, and dynamic state management using React Hooks and Context API.
- Implemented MongoDB for flexible document-based schema design; handled asynchronous server operations using Express/Node.js with optimized middleware stacks.
- Deployed apps on cloud platforms with proper environment configuration, CORS handling, and production-ready error management.

AI Agent Development Suite

Self-Initiated / Codevidhya

- Designed and deployed **multiple AI Agents** using OpenAI, Gemini, and Claude APIs — purpose-built for task automation, intelligent Q&A, and multi-step workflow orchestration.
- Agents cover real-world use cases: customer support bots, content generation pipelines, intelligent data retrieval systems, and automated reporting tools.
- Implemented prompt engineering techniques, memory management, and tool-calling patterns for reliable agent behaviour.

AI-Powered Website Development

Self-Initiated

- Developed production-ready websites end-to-end using AI-assisted tools — from component generation and UI design to deployment — drastically reducing build time.
- Integrated intelligent features including AI chatbots, smart search, and dynamic AI-generated content into MERN Stack applications.

CG Kisan Mobile Application

National Informatics Centre (NIC), Raipur

- Contributed to the frontend interface design and backend service integration for a **government-grade production app** serving the agricultural sector in Chhattisgarh.
- Delivered within strict enterprise timelines — application is live and actively used by farming communities.

EDUCATION

Master of Computer Applications (MCA)	2023	74.13%
Bachelor of Computer Applications (BCA)	2021	71.13%

LANGUAGES

English	Professional Fluency — spoken, written & technical documentation
Hindi	Native speaker
